PROFILE

Performance-driven Full-Stack MERN Developer specializing in Next.js 16 and high-concurrency applications. Experienced in architecting real-time systems with Socket.io and securing data with JWT/RBAC. Focused on delivering scalable, optimized web solutions that prioritize user experience.

SKILLS

Frontend : Next.js 16, React.js, TypeScript, Tailwind CSS, TanStack Query, Framer Motion

Backend : Node.js, Express.js, Socket.io, RESTful APIs, JWT Authentication, RBAC

Tools & Database : MongoDB, Git/GitHub, Vercel, Figma, Render, Postman

PROJECTS

Worship Team (SaaS Management System)

- Architected a real-time management ecosystem for live services, utilizing **Socket.io** to synchronize lyrics across mobile devices with sub-100ms latency.
- Engineered a mobile-first remote control interface and a live audio broadcasting engine to unify team communication.
- Developed a complex chord transposition engine and metronome logic, enabling instant key changes for a library of 8,000+ hymns.
- Implemented a secure **RBAC (Role-Based Access Control)** dashboard for multi-church administration and member progress tracking.
- Repository: github.com/youssefshoukry1/Worship-Team

Coffee Shop Management (Bayt El Bon)

- Optimized revenue flow by integrating the **Paymob API**, handling asynchronous webhooks to ensure 100% transaction verification accuracy.
- Built a real-time barista fulfillment dashboard, reducing order-to-delivery time through automated status tracking.
- Developed a data-driven admin panel providing daily/yearly sales analytics and drink popularity insights per branch.
- Repository: github.com/youssefshoukry1/Bet-el-bon

Movie Time (Discovery Engine)

- Engineered a high-performance movie discovery engine utilizing **TanStack Query** for efficient server-state management and custom hooks for paginated API fetching.
- Designed a responsive, glassmorphic UI with optimized image loading, achieving high performance scores on Vercel deployment.
- Repository: github.com/youssefshoukry1/Movie-website

E-Commerce Platform

- Architected a high-conversion storefront using **React Context API**, ensuring seamless state persistence and rapid cart updates (<50ms).
- Implemented dynamic category-based filtering and SEO-friendly routing for enhanced product discoverability.
- Repository: github.com/youssefshoukry1/ecommerce

EDUCATION

Sadat Academy for Management Sciences - IBM

Bachelor's Degree in Management Information Systems

2024 – 2028 (Expected)

Cairo, Egypt
